Work Experience

Aglivo, Pakistan

June 2022 - May 2025

MERN Developer

- **Luminary Health:** Successfully developed a full-stack Luminary Health Portal, allowing healthcare providers to manage patient referrals, update statuses, and collaborate securely. Key features include user authentication, role-based access, real-time referral tracking, provider communication tools, responsive UI, and admin controls for managing users and referrals. Focused on security, scalability, and performance optimization.
- **Liberty91:** Developed an AI-powered threat intelligence platform automating cybersecurity data collection, analysis, and real-time alerting, tailored to organizational risk profiles without accessing sensitive data.
- **PalPlug:** Build a referral-based career platform where users can sign up as candidates to seek job referrals or as plugs to refer others and earn rewards. Designed user flows for dual-role onboarding, secure communication, and incentivized referral tracking to boost engagement and hiring success.
- **GunBuyBack:** Built GunBuyback.org, a secure nationwide platform enabling individuals to safely sell and dispose of unwanted firearms. Developed personalized offer workflows, integrated secure shipping logistics, and ensured full compliance with federal firearm regulations.

Programmers Force, Pakistan

Mar 2022 - May 2022

Trainee FullStack Developer

- Developed a fully functional social media application named Humanet also created a responsive frontend for a Washing Machine Repairing Website, incorporating user-friendly designs and implementing animations.

CodSoft, India

Jan 2022 - Feb 2022

Intern JavaScript Developer (Remote)

- Worked on frontend designs, DOM manipulation, event handling, date and time handling with real-time updates, implemented Real-time communication, user authentication, WebSocket integration.

Personal Projects

- **Lasting Love:** Developed LastingLove, an app which enables users to create memories, schedule memories, manage trusted contacts, and trigger secure memory delivery upon verified death. Implemented verification workflows, encryption, and scheduled notifications to ensure privacy and reliability.
- **BidBazar(2022-2023):** Developed BidBazar, an online auction website designed to conduct auctions seamlessly and efficiently. The successful launch of BidBazar attracted significant user engagement, demonstrating a demand for online auction services. The project was later on bought by a furniture auction company.
